PROFESSIONAL SUMMARY

Web Developer with 3 years of experience in ASP.NET and C#, recently transitioned into data analytics. Skilled in Python, SQL, Excel, Data Modelling and Data Visualization tools such as Power BI. Passionate about transforming data into actionable insights to support business decision-making.

ACADEMIC HISTORY

Gujarat Technology University | 2019-2022
Bachelor of Science in Computer Engineering
CGPA: 8.35

Government Polytechnic for Girls | 2016-2019
Diploma in Computer Engineering
CGPA: 7.57

WORK EXPERIENCE

Data Analytics Trainee | Mar 2025 - Now

Tops Technology Institute, Surat

- Collected, cleaned, and analyzed data using Python (Pandas, NumPy) and Excel. Created data visualizations using Matplotlib and Power BI to support decision-making. Assisted in preparing reports and dashboards summarizing key performance indicators (KPIs). Conducted exploratory data analysis (EDA) to identify trends and insights.

Web Developer | May 2022 - Feb 2025

Quad Softtech - Surat

- Designed and developed responsive web pages using HTML, CSS, and JavaScript, enhancing user experience across devices in fronted side. Built and integrated new dynamic pages using asp.net and REST APIs to support new product features. Worked across frontend and backend to ensure seamless user interaction and data flow.

SKILLS

Analytics methods: Descriptive statistics, Predictive modelling, Dashboards, Reporting

Web Technologies: ASP.NET, HTML, CSS, Bootstrap

Programming Languages: Python(Pandas, Numpy),C#, JavaScript

Databases: MySQL, SQL Server, SQLYog

Data Tools: Excel, Power BI, Word

Soft Skills: Communication, Problem Solving and Analytical Thinking, Time Management

PROJECTS

1. HR Analytics Dashboard in Excel

Duration: Jun 2025 – Aug 2025

- Designed an interactive HR dashboard in Microsoft Excel to analyze employee data.
- Used Pivot Tables, Charts, and KPIs to track key metrics such as employee turnover, attendance, and department-wise performance.
- Automated data updates using formulas and conditional formatting for better visualization.
- Improved HR reporting efficiency by 20% through dashboard insights.

2. Sales Data Analysis using Python

Duration: Aug 2025 – Sep 2025

- Analyzed sales dataset using Pandas, NumPy, and Matplotlib.
- Cleaned data, handled missing values, and visualized sales trends.
- Discovered top-performing regions and products.

3. Student Performance Dashboard in Power BI

Duration: Oct 2025 – Nov 2025

- Created an interactive dashboard using Power BI.
- Visualized student performance and attendance metrics.
- Used filters and slicers for dynamic data exploration.

CERTIFICATION

- Data Analytics Certification – Tops Technologies, Surat | 2025
- Power BI Data Modelling Basics Tutorial Course - Simplilearn
